

# Camp Menominee

January 21, 2021

Hi CM Parents!

As promised, every week we will be sending out an email with an update on our COVID policies and procedures. Every protocol and policy initiative that we implement this summer relative to COVID-19 will be driven by our desire to mitigate risk and keep our community healthy as best as we can. Today, we are excited to introduce our telemedicine partnership with PediaTrust!

PediaTrust is a group of highly respected pediatric practices in the Chicagoland area and we are thrilled to be one of about a dozen camps implementing Telemedicine through PediaTrust this summer.

In the short term, our partnership will include collaborating with their doctors and experts over the next five months on all aspects of our COVID policies. During the summer, Menominee will have a dedicated MD and office staff for our campers to see for virtual visits. We will still have an excellent medical staff on site as always, but our partnership with PediaTrust will allow our campers access to trusted pediatricians without having to leave our grounds. We are also excited to work with them to determine the most effective and efficient testing practices for our camp population this summer.

In the coming months you'll get all the information you need about this as well as virtual introductions to our Doctor and medical team for the summer. We will cover how this works with your insurance and provide a virtual Q&A with our team before the summer begins.

We have another meeting with our medical advisory team coming up to discuss our pre-summer quarantine protocols. So next week our COVID update will discuss our initial thoughts on that.

Don't forget to check in with [COVID-19 HQ](#) on our site for information and updates.

For the Love of Camp – Jason and the CM Office
